

Piedmont Technical College's Engineering Technology Camp is designed to introduce students to the fun of engineering technology. The camp provides students with challenging opportunities to participate in structured exercises, including engineering technology and computer sciences, design projects and teamwork exercises.

Working in teams alongside mentors, students will explore science and engineering technology topics. Students spend four days on campus participating in hands-on activities in various engineering technology fields, such as robotics, computer-aided drafting and electronics.

Students will develop and present team projects. Prizes will be awarded! Everyone wins!

Engineering Technology Camp June 20 - 23, 2005

for rising 8th grade students
on PTC's Lex Walters
Campus-Greenwood

from
8:30 a.m. - 4 p.m.
